Sony's upper management has set the goal of creating a game that is both fun to play and fun to watch. According to Masaaki Yuasa, "When it comes to motion capture, we have very high expectations from Sony, so I can't wait to see what they are capable of." If you create a game that takes full advantage of the PlayStation 4's capabilities, then it can be enjoyable for a number of reasons. Yuasa said, "One important thing is that we weren't sitting back and simply watching what other people were doing. We were watching what they were doing in a sports game." That is how the motion-capture system functions. FIFA: 20 introduced a spin-off series entitled FIFA 20 Years of Champions, which features players in the first edition of FIFA who had memorable moments in their careers. Many of the players from this series will be appearing in FIFA 22 as well. FIFA is quite fan-friendly because it revolves around football. However, Sony is counting on a more personable touch this time around. The people behind the camera in real life will shoot still photos while the commentators will interact with the players and speak to fans on social media. If you are a FIFA fan, then wait for FIFA 22 to drop on PS4 in October. [Editor's Note: This interview was done last week.] What do you think about the game and the idea of motion-capture that will enhance the visuals of the game? Yuasa: I'm looking forward to seeing a game that is as deep as possible. I'm not someone who really understands that aspect, but I feel like the player is in total control when you get that feeling. On top of that, I'd love to see a game that is fun to play and fun to watch. I want to make sure that the gameplay isn't too complicated and the camera work doesn't simply mimic the movement. Nomura: The gameplay in FIFA is something that I am really good at! So I want to focus on having fun with it. I think our goal is to make it fun to play and fun to watch. I think that being a fan of the game is an essential part of gameplay. It's not the same as the previous title. If you have ever watched a football match, then you will see why the game is different this time. I see. How did you feel when

No more complicated button commands, just use the intuitive D-pad to shoot, pass, dribble, cut and control your players. Get to grips with new techniques, before taking control of your next game. He also seems to be really good at heading the ball, can't touch the deck or feint at this stage (which I think might be a good thing from a cynical stance). [embed] Oh and he seems to fancy running through the Chelsea defence "Go on you crazy Frenchman!" Okay, maybe not that good. And not even that good at heading the ball, first goal is no good! The ball is in the net before it's fully kicked and almost certainly in his hands but it looks like it's been poked out by a defender! [embed] My man Henry finally beats a keeper with a beautiful, floating, curling free kick. Almost a league of his own, this guy is hitting some pretty serious balls right now. [embed] Here's one of my favourite goals of last year. Oh no, that's him! My player got caught out by the keeper diving in the opposite direction, but he gets up and delivers a cracker shot from the edge of the area, into the top corner! [embed] FIA, I've watched you play soccer. I want to be as good as you. Thanks. The verdict Not brilliant, but this was a pretty entertaining video, and he's obviously enjoying the game. I'd definitely give a shot to the Wii U version if you've got the right game. There's a lot of room for improvement and in FUT there were a few bc9d6d6daa
